

MODERNIZE PEOPLESOFT TRAINING WITH ADOBE CAPTIVATE

A Turnkey Solution for Updated, Interactive e-Learning

Training materials become stale over time and get scattered throughout various systems and folders, making it difficult for employees to complete and for organizations to track. With SpearMC's support, your team can convert old, ineffective materials currently dispersed in UPKs, PowerPoint, and Microsoft Word documents, into a consolidated, interactive e-learning library full of the latest information.

Powered by Adobe Captivate, your new e-learning modules can be accessed by employees through their browser, "Help" links within PeopleSoft and other applications, or existing learning management systems.

TYPES OF TRAINING DELIVERY

Employees can access their updated training content in a number of ways:

- Desktop bookmarks that launch training modules in their browser
- In-app "Help" links that open interactive content whenever they need assistance while working in the software
- Learning management systems that deliver training and track completion

POWERED BY

Adobe Captivate

WHY PARTNER WITH SPEARMC?

PEOPLESOFT EXPERTISE

While SpearMC can convert materials about any topic, our deep Oracle knowledge enables our team to be especially effective at PeopleSoft training.

FLEXIBLE CONTRACTS

Partner with us on a one-time training conversion or an ongoing subscription to regularly update materials with the latest and greatest content.

LET'S WORK TOGETHER TO CREATE A SINGLE, UP-TO-DATE E-LEARNING
LIBRARY THAT KEEPS EVERYONE ENGAGED AND INFORMED.
