

Functional Course Agenda

PeopleSoft 9.2 “Get Current Series” Focus on De-Customization Page and Field Configurator Data Masking Drop Zone Overview

This custom training class has been developed for functional users with intermediate technical capabilities. In this section of the “Get Current Series”, the focus is on De-customization of PeopleSoft pages using Page and Field Configurator, Data Masking and Drop Zones.

Through lecture, demonstrations, scenarios, and real-world experiences from implementers, students will learn how to leverage existing functional tools to migrate technically invasive customizations to delivered functionality ready for the next PUM update. By reducing customizations, PeopleSoft customers will not only have an easier time getting current, but staying current as well.

Page and Field Configurator Overview

- Understand Page and Field Configurator
- Use Cases

Page and Field Configurator Setup

- Setup/Modifications
- User Security
- Roles with Exceptions
- Criteria
- Portal Registry
