

# MONITOR HEALTH AND SAFETY

## Efficient, Cost-Effective Deployment

SpearMC partners with your team to set up the PeopleSoft Monitor Health and Safety module with ease. With consistent, uniform data about employee illnesses, injuries, and incidents, your organization can better support their health and safety while meeting regulatory reporting requirements.

- Module is part of Core HR, no additional licenses required
- Fluid employee self-service provides guided steps for incident reporting
- Workflow approvals and notifications sent to Health and Safety Administrator
- Intuitive navigations, dashboard, and analytics for Administrators

## Reduce Implementation Costs and Effort by 50% with SpearMC

SpearMC's deployment service removes uncertainty, enables quick implementation without sacrificing quality. This package includes:

- Assistance with Selective patching to get the latest offering
- Configuration Workbooks and business process guidance
- Standard configurations for Fluid UI, Security, Approvals and more
- Pre-built Incident Summary Analytics
- Tailored Job Aides for Administrators
